PROFESSIONAL SUMMARY

Mid-level Java Developer at Code Group, assigned to Núclea, working in the financial sector with a focus on developing and maintaining payment and receivables microservices. Experience with Java (11/17/21/25), Spring Boot, Apache Kafka, IBM MQ and AWS cloud infrastructure. Applied Artificial Intelligence knowledge, including agents, LLM integration and system integrations through MCP. Use of SDD (specification-driven development) in the development cycle. Software Engineering undergraduate with a Full Stack background (React, Angular, Next.js, Node.js), connecting back-end, front-end and business needs.

TECHNICAL SKILLS

Languages: Java (11/17/21/25), SQL, JavaScript, TypeScript

Backend & Integration: Spring Boot, Spring MVC, Spring Data JPA, API RESTful, Apache Kafka, IBM MQ, Node.js

Cloud & Infrastructure: AWS (EC2, ECS, EKS, S3, Secrets Manager, CloudWatch, SQS, SNS, RDS, Aurora, Lambda), Docker

Frontend: React, Angular, Next.js, HTML5/CSS3

Databases: DynamoDB, SQL Server, PostgreSQL

Artificial Intelligence: Agents, LLM integration (OpenAI, Claude), MCP, SDD, Prompt Engineering

Tools & DevOps: Git, GitHub, Maven, Gradle, Postman

Methodologies: Scrum, Kanban, Unit Testing (JUnit), Data Structures

PROFESSIONAL EXPERIENCE

Mid-level Java Developer | Code Group (Assigned to Núclea)

Hybrid | Nov/2025 - Present

Promoted from Junior to Mid-level Java Developer in September 2026.

- Development and maintenance of microservices in the Payments and Receivables tribe, using Java, Spring Boot and Apache Kafka in a high-performance, high-transaction-volume environment.
- AWS infrastructure: container orchestration with EKS, EC2 instances, S3 storage, CloudWatch monitoring and alerts, asynchronous messaging through SQS/SNS, relational databases with RDS/Aurora and serverless functions with Lambda.
- Working in an agile environment with Scrum, participating in planning, review and retrospective ceremonies in continuous delivery cycles.

IT Intern | MyData Cloud

Marília, SP | Aug - Nov/2025

- Technical support for Linux server infrastructure, network monitoring and incident diagnosis in R&D projects.

EDUCATION

Bachelor's Degree in Software Engineering

UNIMAR | Started: Jan/2025 | In progress

Technical Degree in Systems Development

SENAI | Started: Jan/2023 | Completed: Dec/2024

RELEVANT PROJECTS

Controle Financeiro - Personal project in progress

Technologies: Java 21, Spring Boot 4, Next.js, PostgreSQL

Full Stack application for managing accounts, transactions, credit cards and invoices, tracking investments and planning goals. Backend with financial rules, authentication and scheduled jobs; interface with personal planning dashboards.

github.com/kaiqueGeraldo/controle-financeiro

HBU Gestão Cirurgias - Completed academic project

Technologies: Java 21, Spring Boot 4, Next.js, PostgreSQL

Surgical workflow management system with scheduling, team and room organization, surgery tracking and change history. Role-based access. I developed the frontend and backend as an academic project at Unimar.

github.com/kaiqueGeraldo/hbu-gestao-cirurgias

MindTask - Idea and Project Organization

Technologies: React (Next.js), Node.js, SQL Server

Full stack application for managing personal projects with groups, checklist tasks, drag and drop, favorites and linked account switching. Backend in Node.js with SQL Server (MVC pattern) and JWT authentication.
